

VISHAL VISHWAKARMA

FULL STACK & AI SYSTEMS ENGINEER

Email: 2vishalvishwakarma@gmail.com | Phone: +91 9353802970 | Portfolio: vishalvishwakarma.com | GitHub: github.com/vishzzl | LinkedIn: linkedin.com/in/vishzzl

PROFESSIONAL SUMMARY

Results-driven Full Stack and AI Systems Engineer with 5+ years of professional experience designing, building, and deploying robust cloud-native applications and intelligent multi-agent AI ecosystems. Proven track record at Deloitte and Accenture in ERP migrations, real-time telemetry systems, high-scale RAG pipelines, and serverless architectures. Deep expertise in C#.NET Core, Next.js, Azure cloud infrastructure, and advanced LLM frameworks like LangGraph and LangChain.

TECHNICAL SKILLS

AI & Automation	LangGraph, LangChain, Semantic Kernel, RAG Pipelines, Vector DBs (Qdrant, Azure AI Search), ML Fine-Tuning (QLoRA, Q&A patterns), FastAPI, gRPC
Backend & Core	C#.NET Core (.NET 9/8), ASP.NET Web API, RESTful APIs, GraphQL Gateways, Domain-Driven Design (DDD), Clean Architecture, Python
Cloud & DevOps	Microsoft Azure (Container Apps, Service Bus, Logic Apps, Key Vault, Functions), Docker, KEDA, Pulumi (IaC), GitHub Actions CI/CD
Data Engineering	Azure Databricks Lakehouse, dbt KPI Pipelines, PostgreSQL, Cosmos DB (vCore), Azure Cache for Redis, SQL Server
Frontend	React, Next.js (App Router), TypeScript, JavaScript, TailwindCSS, Framer Motion, Vanilla CSS

PROFESSIONAL EXPERIENCE

Deloitte · Consultant (Full Stack Software Engineering)

2025 - PRESENT

Focus: Cloud ERP Modernization & Advanced Analytics Pipelines

- Architected Mankind Pharma sales forecasting analytics utilizing Azure Databricks lakehouses and automated dbt pipelines for complex sales KPI aggregations.
- Achieved sub-second API response times across high-scale transactions utilizing Azure Cache for Redis clusters.
- Engineered real-time data synchronization pathways using Azure Service Bus message brokers, eliminating legacy batch schedulers.
- Migrated 5,000+ daily legacy operational records utilizing serverless C# .NET 9 Azure Functions with 100% data integrity.
- Successfully integrated Guidewire BillingCenter (Guidewire FAH) with enterprise ERP systems while ensuring full financial audit compliance.

Accenture · AI Automation Lead (Senior Analyst)

2023 - 2025

Focus: Multi-Agent AI Orchestration & Machine Learning Pattern Identification

- Led end-to-end AI automation initiatives, designing multi-agent reasoning workflows using LangGraph and LangChain.
- Fine-tuned open-source LLMs using QLoRA parameters to analyze system metrics and identify complex infrastructure health patterns.
- Built low-latency gRPC and RESTful API endpoints for AI service integrations, serving highly transactional pipelines.
- Integrated Qdrant vector database indexes to scale semantic search across millions of unstructured internal knowledge documents.
- Maintained 99.9% application availability by implementing and configuring KEDA autoscaling rules on Azure Container Apps.

PROFESSIONAL EXPERIENCE (CONTINUED)

Accenture · Senior Software Engineer (Senior Analyst)

2022 - 2023

Focus: Enterprise Backend Services & Domain-Driven Architectures

- Engineered over 30 secure, high-throughput RESTful API controllers in ASP.NET Core, integrating predictive ML models.
- Scaffolded enterprise microservices utilizing Domain-Driven Design (DDD) patterns and C# Clean Architecture solutions.
- Designed low-latency GraphQL gateways to consolidate disparate microservice payloads, reducing round-trips.
- Orchestrated real-time data synchronization pipelines across multi-cloud databases using Azure Logic Apps.
- Secured application credentials with Azure Key Vault integrations, achieving 100% security audit compliance.
- Delivered comprehensive system observability utilizing OpenTelemetry traces, metrics, and centralized logging.

Accenture · Cloud Automation Engineer (Analyst)

2021 - 2022

Focus: Infrastructure as Code & Automated CI/CD Platform Operations

- Orchestrated secure multi-tenant cloud environments using Pulumi for type-safe Infrastructure as Code (IaC).
- Wrote background Python scripts for bulk records migrations, automated resources cleanups, and regular environment audits.
- Designed serverless Azure Logic Apps workflows to synchronize cloud alerts and operations across internal departments.
- Built fully automated GitHub Actions CI/CD pipelines, slashing release cycles and automating unit/integration testing.

SELECTED CASE STUDIES

Enterprise RAG Platform · Role: Lead AI & Backend Engineer

Impact: -60% Knowledge Retrieval Time

Designed an enterprise compliance Q&A engine querying millions of PDFs. Built ingestion pipelines on Azure Functions, vector parsing on Cosmos DB, and Semantic Kernel (C#) LLM orchestrations with strict guardrails, achieving 97.4% citation accuracy.

Cloud-Native SaaS Logistics Platform · Role: Lead Systems Architect

Impact: Scaled 10k+ Users / Zero Downtime

Architected migration of monolithic logistics dashboards to multi-tenant Azure Container Apps. Designed event-driven queues with Azure Service Bus, partitioned tenant schemas in PostgreSQL, and achieved 35% cost reduction through autoscaling.

MICROSOFT AZURE CERTIFICATIONS

Microsoft Certified: DevOps Engineer Expert	Credential ID: 4EE904-C0E457 (Active 2023 - 2026)
Microsoft Certified: Security Engineer Associate	Credential ID: 9L956B-AEE751 (Active 2023 - 2027)
Microsoft Certified: Power BI Data Analyst Associate	Credential ID: F46DE9-AE3119 (Active 2025 - 2026)
Microsoft Certified: Developer Associate	Credential ID: CCFA74-AG6633 (Active 2022 - 2026)
